

# CUTLERY BOXES

Parade's divided cutlery boxes are perfect for any restaurant organization, large or small. These items are made from the best FDA approved plastics. We never substitute materials to reduce cost. Our cutlery boxes feature four separate compartments for organizing and transporting silverware.

Each compartment is intentionally designed with a smooth interior surface to allow a more efficient, easy cleaning. The outer surface features a textured design that is resistant to scratching and marring for a long and attractive service life. The individual compartments are rounded so silverware can be retrieved with ease. Reinforcements have been placed between each compartment for extra support and rigidity. The handles located on each side of the cutlery box are reinforced to prevent breaking. The smaller profile of this cutlery box will help to conserve much needed space when nesting.

The cutlery box is offered in one size and three standard colors and is dishwasher safe.
